# Independent perspective. *African priorities.*

An invitation to help build an African-centred editorial platform for governance diagnostics, accountability, and the people advancing the continent.

## Our editorial agenda

### Governance diagnostics

Examine electoral integrity, rule of law, state capacity, and economic management through transparent, contextual research.

### Public accountability

Follow public records, procurement, resource contracts, and the institutional response to established findings.

### The African Renaissance

Investigate innovation, energy, inclusion, and public progress with the same rigour applied to failure.

## Ways to collaborate

**Research partnerships**
Expertise, peer review, public-interest datasets, and jointly defined research questions.

**Editorial collaboration**
Publication, translation, dissemination, and briefings around shared research interests.

**Institutional & project support**
Defined programmes, transparent deliverables, and protected editorial independence.

> **Launch-stage proposal.** This introduction describes proposed work. It does not claim established funding relationships, audience figures, published country ratings, or measured policy outcomes. Partnership scope and reporting commitments are agreed through direct discussion.
